GRIP POD SYSTEMS

Tested and approved by the US Army, Marines, National Guard and the British Armed Forces as their premiere weapon stabilizing system.

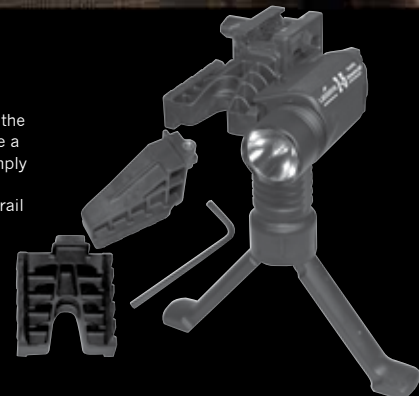

The Grip Pod System™ (GPA™) is a revolutionary vertical fore-grip integrated with a strong and stable bipod. The Grip Pod's legs deploy at the push of a button - instantly! It offers a combination of advantages never before available in a single accessory. The GPA™ is manufactured from aerospace materials to exceed military specifications for construction and finish. It mounts directly to all Picatinny rail systems, and additional mounting options will be available soon.

GPA-000-GP1	Black, Tactical with Steel reinforced legs
GPA-000-GP3	Tan, Tactical with Steel reinforced legs
GPA-000-LE	Black, LE Version
GPA-000-LET	Tan, LE Version

Grip Pod Light Rail Module

The Light Rail Module adds a rail system to the Grip Pod System and allows the user to have a tactical light or laser at their finger tips. Simply attach the LRM to the Grip Pod System and then add any tactical accessory to the LRM rail and continue with the mission.

#GPA-000-LR1	Black, Single Light Rail
#GPA-000-LR2	Black, Double Light Rail
#GPA-000-LR1T	Tan, Single Light Rail
#GPA-000-LR2T	Tan, Double Light Rail

Nightforce Ultralite 30mm Scope Rings

When a tough, reliable mounting system is required without adding substantial weight, Nightforce Ultralite rings are the answer. They feature CNC machined 7075-T6 hard anodized black aluminum bodies and titanium beta series crossbolts and jaws. This unique construction provides exceptional strength, normally not found in lightweight rings. Testing has proven that this combination is actually stronger than steel.

#117-NF-885UL	Low Rings	.885"

Barrett 30mm ExRings

Barrett ExRings with Pin-Lock technology is a dual setting MOA extended range ring set that utilizes the riflescope's precise internal elevation adjustment by aligning the scope for long range shooting. Barrett's ZERO-GAP technology provides definitive holding power for heavy scopes under the harshest recoil.

Purpose: To maximize the riflescope's precise internal elevation adjustment by angling the scope without compromising the rigidity of a one piece mount.
 #HRB-30MM-EXR

Nightforce Anti-Cant Device Top Ring Bubble Level

This anti cant device from Nightforce features a bubble level to show the shooter if they are canting to the left or right. The device is only for use with the Nightforce Unimount, Direct Mount or Steel Rings.
 #117-NF-BAPLVL

Barrett 1" Scope Ring Adapters

1" scope ring adapters, 82124-AD1, are used to adapt 30mm rings for use with a 1" scope. Four adapters are required per scope.

(Shown on #22 Ring)
#ARMS-22TRC

A.R.M.S. #22TRS

Tactical Rail Sight
(Shown on #22 Ring Cap)
#ARMS-22TRS

A.R.M.S. #63

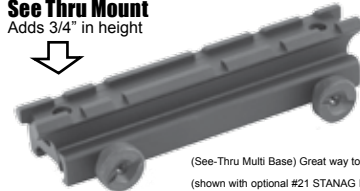

Combines all the features of the #5 with the #19!! Provides 3/4" of additional height for mounting optics with large objective lenses. Compatible with STANAG mounts and features a see-through channel for use with iron sights.

#ARMS-63

See Thru Mount

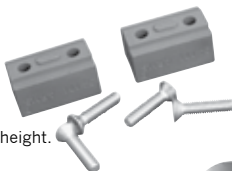

Adds 3/4" in height

(See-Thru Multi Base) Great way to mount on #3's and #4's (shown with optional #21 STANAG Rings)

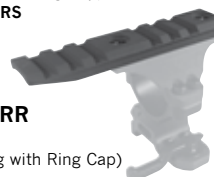

A.R.M.S. #22-34 Ring

34mm Scope Rings
#ARMS-22-34

A.R.M.S. #22TRR

Tactical Ring Rail
(Shown on #22 Ring with Ring Cap)
#ARMS-22TRR

A.R.M.S. #22-34SP

Optional spacer for additional height.
#ARMS-22-34SP

A.R.M.S. Ring Inserts #37

The #37™ Ring inserts are all steel with a Mil-spec phosphate finish, for ultimate surface protection. Converts all A.R.M.S. and other 30mm rings to 1". (Sold as a pair)
#ARMS-37

A.R.M.S. #5 Multi-Base

Quick detachable, multiple eye relief, spring loaded clamping bar, iron sight see-thru. NATO STANAG and Weaver rail fastening, self-locking captivated thumbnuts.
#ARMS-05

MSP Variable Eye Relief Scope Mount and 30mm Rings with MOR Rail

Your option:

- Six or more rail positions for eye relief (the 9" rail has even more optional mounting positions)
- Some available in longer lengths and with MOA
- Attaches to any mil-spec rail
- Additional spacers are available for the #35 Rings to add even more height if you have a large objective on your scope or need extra height
- Modified versions available for long and short action rifles and some two piece bases
- Ideal for mounting scopes for optimal functionality and eye relief comfort

Kit Includes:

- 6" or 9" Eye Relief Rail (9" length available in straight or with 15, 20, 25 or 30 MOA)
- A.R.M.S. #35QD Rail
- A.R.M.S. #35L 30mm Scope Rings

- #MOA-ER-SET-6-0 30mm Rings with 6" Straight Rail
- #MOA-ER-SET-9-0 30mm Rings with 9" Straight Rail
- #MOA-ER-SET-9-15 30mm Rings with 9" 15 MOA Rail
- #MOA-ER-SET-9-20 30mm Rings with 9" 20 MOA Rail
- #MOA-ER-SET-9-25 30mm Rings with 9" 25 MOA Rail
- #MOA-ER-SET-9-30 30mm Rings with 9" 30 MOA Rail

MSP Add-A-Rail System

Mounts Top/Bottom or Side Mounting Options

Tactical Forearm Rail Kit

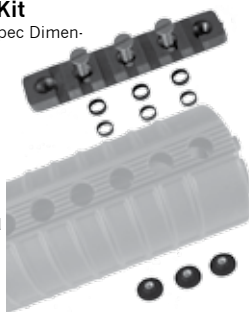

TOP or BOTTOM Mount (Mil-Spec Dimensions)

- Rail Mounted Bi-Pods
- Flashlights
- Many other uses

For use with factory standard A-2 and M4 forearms.

Designed to allow use of a detachable light, vertical foregrip, or other rail mounted accessories.

#LLR-TFR-NR1

Examples of uses for Add-A-Rail System...

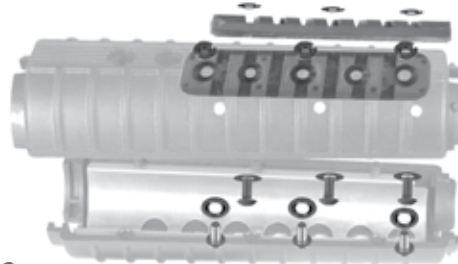

Tactical Forearm Rail Kit

SIDE Mount (Mil-Spec Dimensions)

For use with factory standard, A-2 and M4 forearms. Designed to allow use of a detachable light or other rail mounted accessories.

#LLR-TFR-NR4

Double Picatinny Rail

For custom mounting solutions

#LLR-TFR-DPR

Modified A.R.M.S. #35QD

Throw-lever repeatability & maintainability two-piece unit for any mil-spec 1913 rail
Multiple positions of throw levers for long and short action rifles & variable eye relief. Most versatile system available today! Adds .75" to height.

#MOA-A35-002

MSP 9" MOA Rail

Rail with built-in MOA, designed to fit the #35QD Dual Throw lever base.

- #MOA-PAL-000 9" Straight Rail
- #MOA-PAL-015 9" 15 MOA Rail
- #MOA-PAL-020 9" 20 MOA Rail
- #MOA-PAL-025 9" 25 MOA Rail
- #MOA-PAL-030 9" 30 MOA Rail

(For extra eye relief... Use our 9" straight rail)

MSP 9" MOA Rail with Modified A.R.M.S. #35QD

A combination of A.R.M.S. #35QD Dual Throw Lever Scope Mount Base cut in two with a MOA Rail for long distance shooter.

- #MOA-SET-T00 9" Straight Rail
- #MOA-SET-T15 9" 15 MOA Rail
- #MOA-SET-T20 9" 20 MOA Rail
- #MOA-SET-T25 9" 25 MOA Rail

Gunsmith Kit for Add-A-Rail System

Rail Gunsmithing Kit Contains:

- 10 Rails
- 15 Well Nuts
- 15 Well Nut Small Bushings
- 15 Well Nut Large Bushings
- 15 Socket Cap Screws
- 15 Button Head Cap Screws
- 12 Reverse Countersink Filler Nuts
- 15 Large Curved Washers
- 15 Small Curved Washers
- 1 Hex Wrench
- 1 Drill Bit
- 1 Spanner Wrench
- 1 Instruction Manual

#LLR-TFR-NR3

Reverse Countersunk Nuts and Wrench

(Mil-Spec Dimensions)

For use on installation of rails which have tapered countersunk holes. Kit contains 12 nuts (#8/32 threads) and one wrench.

#LLR-GST-001

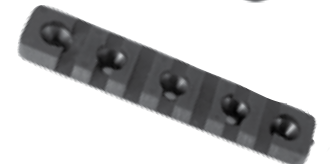

Tactical Forearm Rail

Rail only, no hardware.

(See Gunsmithing Sections for Armor's Kit)

IMS (Interchangeable Mounting Systems)

A multiple size mounting system based on a small platform (common to many manufacturers) with many add on features. Attachments range from flat to angular rails, sling swivels, Docter Optic style interfaces and even leveling devices for accurately mounting scopes and ACD's. More attachments coming soon.

PART NUMBERS:

- 1 #IMS-S71-001-BAS Thumbscrew platform common to all attachments.
- 2 #IMS-S71-002-45U 45° mounting adaptor extending above the S71 base
- 3 #IMS-S71-003-45D 45° mounting adaptor offset and below the S71 base.
- 4 #IMS-S71-004-90U 90° mounting adaptor extending above the S71 base.
- 5 #IMS-S71-005-RAL 1913 rail attaching to S71 base and all angular adaptors
- 6 #IMS-S71-006-SSS Sling swivel stud attaching to the S71 base and all angular adaptors
- 7 #IMS-S71-007-BYU Blank steel plate attaching to the S71 base and all angular adaptors. Build your own special mount.
- 8 #IMS-S71-008-DOA Docter Optic style mount attaching to the S71 base and all angle adaptors.
- 9 #IMS-S71-009-LVL Multi plane level attaching directly to the S71 base action level for precision scope , scope optic and ACD mounting.
- #IMS-S71-010-RSR 1/8 inch riser for S71 base and mounts.
- #IMS-S71-SET-B01 S71 base with build your own adaptor.
- 10 #IMS-S71-SET-B45U S71 base with 45° up adaptor and build your own mount.
- 11 #IMS-S71-SET-B45D S71 base with 45° down adaptor and build your own mount.
- 12 #IMS-S71-SET-B90 S71 base with 90° adaptor and build your own mount.
- 13 #IMS-S71-SET-R01 S71 base with 1913 rail.
- #IMS-S71-SET-R45U S71 base with 45° up adaptor and rail and 1913 rail.
- #IMS-S71-SET-R45D S71 base with 45° down adaptor and 1913 rail.
- #IMS-S71-SET-R90U S71 base with 90° adaptor and 1913 rail
- #IMS-S71-SET-S01 S71 base with sling swivel stud
- #IMS-S71-SET-S45U S71 base with 45° up adaptor and sling swivel stud
- #IMS-S71-SET-S45D S71 base with 45° down adaptor and sling swivel stud
- #IMS-S71-SET-S90 S71 base with 90° adaptor and sling swivel stud.
- #IMS-S71-SET-DO1 S71 base with Docter Optic style mount
- #IMS-S71-SET-D45U S71 base with 45° up adaptor and Docter Optic style mount.
- #IMS-S71-SET-D45D S71 base with 45° down adaptor Docter Optic style mount.
- #IMS-S71-SET-D90 S71 base with 90° adaptor and Docter Optic style mount.
- #IMS-S71-SET-LVL S71 base with level

- #IMS-S71-SET-CON Convert Samson platform to S71 screws
- #IMS-L71-001-BAS Large thumb screw platform common to all attachments.
- #IMS-L71-005-RAL 1913 rail attaching to the L71 base.
- #IMS-L71-010-SRS 1/8" riser for L71 base.
- #IMS-L71-006-SSS L71 base with sling swivel stud.
- #IMS-L71-007-BYU Blank steel plate attached to the L71 base-build your own special mount.
- #IMS-L71-SET-BY1 L71 base with steel build your own adaptor.
- #IMS-L71-SET-R01 L71 base with 1913 rail.
- #IMS-L71-SET-SO1 L71 base with sling swivel stud adaptor.

Weaver Tactical Flat Top Riser Rail - Quick Detachable

Made from aircraft-grade 6061-T6, aluminum and has Type III hard coat anodizing for years of rugged use. Engineered to provide the optimal mounting height for all types of optic and ring combinations, the new Flat Top Riser Rail is available in both standard and quick detach models.

A.R.M.S. SPARTAN RAIL

- Lightweight modular rail system specifically designed to accept a variety of advanced lighting and laser modules into the rail system with minimal increase in the weapons size or signature
- Modular control surfaces allow intuitive and reliable placement of activation buttons without adhesives
- Proprietary design allows for exceptionally strong and precise mounting on M4 platforms using the standard barrel nut
- Available in Carbine and Mid Length systems

#ARMS-56M-CV-C Carbine Rail
#ARMS-56M-CV-EXT Mid Length Rail

A.R.M.S. S.I.R. SYSTEMS

Selective Integrated Rail® System

A.R.M.S. S.I.R. System can provide a multitude of modular capabilities for accessories like: thermal imager, lasers, night vision, optical sight, M203, etc. The A.R.M.S. S.I.R. System has more unique and helpful features for the professional user than all other devices combined. Only the A.R.M.S. S.I.R. System allows you to have dovetail rails where you want them and not where someone else decided for you.

No other system keeps the weapon as cool during firing as the A.R.M.S. S.I.R. System. No more hot, uncomfortable dovetail rails to deal with like on other systems. The A.R.M.S. S.I.R. System has a true free float barrel that does not require the barrel to be removed during installation, like on other tube designs. A unique quick change polymer hand-guard allows easy access to clean the barrel without removing the system or barrel. The S.I.R. System works with any type front sight you may have. No special tools are required to install. A coin is all that is needed.

The S.I.R. allows for the attachment of different sized rails to customize your S.I.R.® system. The S.I.R. System comes stock with one each of the #1, #2, and #3 rails which can be interchanged into many different configurations on the hand-guard. If a rail is not being utilized, simply remove it until needed to save on weight. The longer #4 rail is also available. The S.I.R. System allows multiple attachments tailored to the needs of the user's mission.

PRI GEN III Carbon Fiber Upper

The Latest PRI Gen III free float forearm and barrel nut are constructed of light weight, high strength carbon fiber, aluminum, and high strength steel for the best possible combination of weight and strength. The carbon fiber also reduces the amount of heat transferred to the shooter's hand during rapid or high volume firing. The long top rail matches the height of the top rail on the standard flattop receiver and is compatible with the ARMS family of rails.

PRI Gen III Delta Carb Fiber Forearm

Designed for most piston or op-rod systems

This new Free-Floated Carbon Fiber forearm is in the triangular shape, (Delta) configuration and was designed to work with most piston or op-rod systems out in the market today. The Delta forearm uses the same easy locking system as the original round tubes. The forearms come in Black or Dark Earth colors. The forearm comes with 4 rails, 1 rail on top and then 3 rails at 3,6 and 9 O'clock positions. The forearm is constructed of wrapped carbon fiber, with an aluminum barrel nut and collar. The receiver and the rail on forearm are not at the same elevation. The inner diameter of the barrel nut is 1.020".

ATI AR-15 Carbine Two Piece Forend Combo Rail Package

Give your AR-15 some personality with ATI's new 8 sided forend. Insert rails at 45° angles around the circumference of the forend for ultimate versatility! Additionally, slide rails in any position on the forend for nearly unlimited customization.

Features of Forend:

- Rail locations at 45° increments around forend
- Millions of rail configurations
- Put accessories exactly where you want them
- Extremely tough, yet lightweight
- Available rail sizes, 2", 3", 4", 6" and 12"

Comfortably place rails at 45° angles for a more natural placement of accessories.

ATI AR-15 Carbine Two Piece Forend Combo Rail Package

Package Includes:

- Hard Coat T6 Aluminum Carbine Forend
- Two 2", Two 4", and Two 6" Rails
- Delta Ring

ITT Enidine AR Restor Hydraulic Recoil Buffer

Enidine AR-Restor Hydraulic Recoil Buffer.

This is the best buffer on the market today! Reduce felt recoil, improve accuracy, reduce fire rate, suppress bolt bounce, and protect your valuable optics with this simple drop-in replacement. Enidine hydraulic recoil buffers have been employed in military applications to reduce recoil, improve accuracy and increase reliability. Examples include the soft mount for the M2 machine gun and the M249 SAW. Tests have shown the buffer to produce a reduced rate of fire by approximately 200 rounds per minute. The Enidine AR-Restor Hydraulic Recoil Buffer comes with a full 1 year warranty.

Magpul MOE Hand Guard

The Magpul MOE™ Hand Guard for M16/AR15 rifles with carbine-length gas systems combines the light weight of a standard hand guard with modular flexibility. Slots at the two, six, and ten o'clock positions allow for optional mounting of Picatinny rail sections for tactical lights and other accessories. Reinforced, heat-resistant polymer construction provides operational durability without the weight and expense of an aluminum rail hand guard.

Magpul ACS Carbine Stock, Mil-Spec Version

drop-in replacement butt-stock for carbines using mil-spec receiver extension tubes. A streamlined, anti-snag profile shields the release latch to prevent accidental activation and the extra-power lock mechanism uses a premium chrome-silicon spring to avert auto-collapse failure by resisting spring relaxation.

Magpul MOE Polymer Rail Section

Designed for use with MOE Hand Guards and most standard plastic hand guards, the MOE Polymer Rail Sections allow the attachment of various 1913 Picatinny spec rail-mounted accessories such as lights, vertical grips, etc.

#MAG-406-BLK Size L2 (5 Slots), max overall length of 2.5"
#MAG-407-BLK Size L3 (7 Slots), max overall length of 3.25"

#MAG-FAL002-BLK

Magpul MOE Illumination Kit

The Magpul MOE Illumination Kit includes everything needed to mount a 1913 Picatinny rail compatible weapon light to a Magpul MOE Hand Guard. The four-piece kit includes a short rail section, cantilever rail mount, two Surefire optimized pressure switch pad mounts (both old and new styles), and all mounting hardware.

#MAG-402-BLK

Magpul UBR Stock

The Magpul UBR™ (Utility/Battle Rifle), is a fully-featured, adjustable butt-stock for the AR15 / M16. Unlike typical collapsing stocks, this modular design offers the stability of a fixed stock with consistent cheek weld in any position. Seven-position length-of-pull (LOP) adjustment is quickly executed with gross motor movement while the integral preset system allows direct access to a preferred position. A robust lock mechanism and multi-shell construction increase durability under severe impact conditions experienced during malfunction clearing and accommodates large-bore AR calibers.

ERGO F93 PRO 8 position collapsible AR-15 Stock

The ERGO F93 Pro Stock features a fixed cheek piece for a constant and repeatable cheek weld in any of the eight available stock positions. Once the butt is locked into position, the F93 is as rigid as a fixed stock. Included is an overmolded carbine length buffer tube, a standard castle nut and an ambidextrous sling plate. At 8" from receiver to butt plate when completely collapsed and 12" when fully extended, this stock gives the shooter plenty of room for adjustment. This assembly weighs 1.3 pounds and is made in the USA.

- #105-71EG00-DK Dark Earth

Duostock Tactical M4/CAR15 Stock

The patented Tactical Duostock is a modification to the stock of a rifle or shotgun for the specific use in Close Quarters Battle (CQB). It consists of an upper and lower surface for the absorption of recoil. The upper surface is the same as any other long weapon. The lower surface is specially angled to ride on the upper chest with the use of body armor. The bottom of the stock is rounded and allows smooth targeting of the weapon. This makes for a more stable, consistent shooting platform with the sights and barrel close to the line of sight. This results in increased comfort, speed, and accuracy in any shooting position.

A.R.M.S. #71L series, Front and Rear Sights

- Designed to allow attachment to all Universal Dovetail 1913 and Weaver style Rails.
- Both are made from durable, metal-reinforced polymer and are a good option when seeking a quality sight.
- Both are .610" when in the folded position, from the top of the receiver.

The #71L-F (front sight) is rail mounted with a quick deploy latch and adjustable for elevation while the #71L-R (rear sight) features the same metal dual apertures, utilized in the A.R.M.S. #40L under contract with Crane Naval Special Warfare Center, for both CQB and long range shooting applications.

- #ARMS-71L-F-R Front and Rear Sights Set
- #ARMS-71L-R Rear Sight
- #ARMS-71L-F Front Sight

A.R.M.S. #40 - ORIGINAL

The unique design of the spring loaded rear sight ensures constant in battery action and repeat zero. The sight is held in the locked down position by a quick release lever, that prevents the sight from being accidentally engaged, but is as fast as a trigger to release even with arctic mittens. Has military horizon line notch, 500-600 meter sight. Windage adjustments .75 MOA

#ARMS-40

A.R.M.S. #40A2

Flip Up Rear Sight 250 to 300 meters
#ARMS-40A

A.R.M.S. #40L

The #40L has all the features of our excellent 40A2 sight, but has a lower profile, allowing more clearance for mounting optics to your flat-top receiver and allows lower mounting, miniaturized windage knob with .75 M adjustment and a very new and unique dual aperture.

#ARMS-40L

A.R.M.S. #40L-SP

The #40L-SP is identical to the #40L but it utilizes the same plane aperture system. Choose between large and small apertures without worrying about them being zeroed to different ranges.

#ARMS-40L-SP

A.R.M.S. #40L-P

"P" Means Precision. .50 MOA = minute of angle, means at 100 meters, each click of the windage knob moves the apertures .50 = 1/2 inch, which means point of impact .50 left or right of the previous click setting.

#ARMS-40L-P

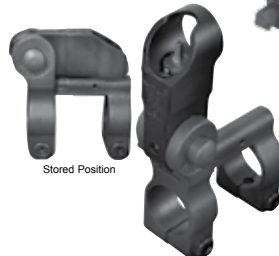

A.R.M.S. #41B

Front folding sight solves the problem of trying to fold the well known triangle shape of the conventional non folding front sights. Barrel mounted in place. Utilizes a rugged spring loaded angled support system to eliminate getting caught up in brush and other combat hazards. Also uses the standard front sight post. #ARMS-41B

A.R.M.S. #41B-L

Same as the #41B with bayonet lug.
#ARMS-41B-L

PRI Flip Up Rear Sight

Designed to work on the same plane aperture system that allows the operator to choose between two different settings without losing zero. The low profile sight will allow the use of optics and the top rails. The sight folds up into a locked and secured position with windage adjustment.

#PRI-FUP-RSO

PRI Rail Mounted Flip Up Sight

The rail mounted sight works on any rail that is mounted at the same levels as the receivers rail.

#PRI-FUP-RMF

Adams Arms Drop-In Piston Conversion Kits

There are those that believe the current AR15/M-16 Platform should be replaced with newer rifles costing much more than the current system in place. What these companies and/or designers fail to recognize is that there are millions of these rifles already in service around the world, whether owned by Private Citizens, Military, or Law Enforcement.

The Adams Arms Gas Piston System is an end user installed after-market product for Mil-Spec ARs. It will fit on any AR barrel with a .750" or 3/4" diameter at the shoulder where the front sight base sits.

Adams Arms Drop-In Piston Conversion Kits - AR Pistol (PDW) with 4" Free Float Quad Rail

- Contains our one piece bolt carrier and a four inch 4 railed forend.
- Fits 7.5" to 8.5" barrels that has an existing pistol gas system.

#116-AA-PPD-D-ADA

Adams Arms Drop-In Piston Conversion Kits - Carbine

- Contains our 1 piece bolt carrier, handguards and handguard cap. The Adams Arms Gas Piston System is an end user installed after-market product for Mil-Spec ARs.
- Fits 10.5" to 16" barrels that has an existing midlength gas system.

#116-AA-CPS-D-ADA

Adams Arms Drop-In Piston Conversion Kits - Mid Length

- Contains our 1 piece bolt carrier, handguards and handguard cap. The Adams Arms Gas Piston System is an end user installed after-market product for Mil-Spec ARs.
- Fits 16" to 18" barrels that has an existing midlength gas system.

#118-AA-MPS-D-ADA

Adams Arms Drop-In Piston Conversion Kits - Rifle Length

- Contains our 1 piece bolt carrier, handguards and handguard cap. The Adams Arms Gas Piston System is an end user installed after-market product for Mil-Spec ARs.
- Fits 18" to 24" barrels that has an existing midlength gas system.

- Stainless Steel
- Four 10-32 set screws, two tangential clamping for added clamping.
- Extended front to cover standard FSB scar

#SMC-GAS-BLOCK

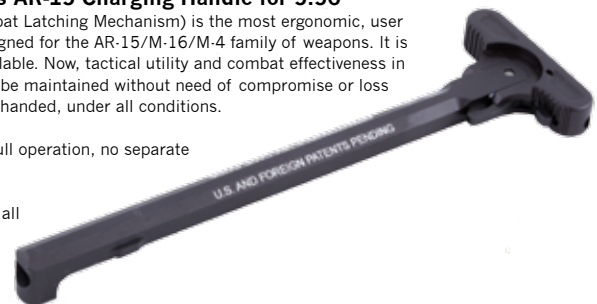

ArmaDynamics ACLM, Ambidextrous AR-15 Charging Handle for 5.56

The ARMADYNAMICS™ ACLM™ (Advanced Combat Latching Mechanism) is the most ergonomic, user friendly, and advanced charging handle ever designed for the AR-15/M-16/M-4 family of weapons. It is the only truly ambidextrous charging handle available. Now, tactical utility and combat effectiveness in charging of the weapon under all conditions can be maintained without need of compromise or loss of tactile efficiency for all operators, right or left handed, under all conditions.

FEATURING:

- Patent-pending, completely intuitive, straight pull operation, no separate latch activation required
- Unique fully ambidextrous grasping handle
- Aggressive tactile grasping surfaces function in all situations
- Manual override button equipped
- Proprietary TEFLON inserts assure reliable operation in all environments
- Manufactured from aircraft grade aluminum 7075-T6 alloy, and Ordnance grade 4100-Series steels
- Finished to MIL-A-8625 Type III, Class 2 hard coat & MIL-DTL-13924D military specifications
- Available Finishes: MIL SPEC Flat Black
- Model A081 for 5.56/6.8/9mm AR-15/M-16/M4 style and related weapons

Nightforce Remington 700 Bases w/ 20 MOA

An integral recoil lug machined on the bottom of the base provides a precise fit when bedded to the rifle's action, preventing any movement of the base or recoil stress on screws holding the base to the receiver. (Bedding Compound not included)

One-piece bases are machined to exact Picatinny Mil. Std. 1913 specification rail dimensions. This design allows the same scope to be used on several different rifles, always optimizing eye relief with 20 M.O.A. tapers. Designed for right- or left-hand actions, our bases will never interfere with loading or extraction.

Rifle Basix Triggers

Rifle Basix after-market triggers feature state of the art CNC machined housings made from T6 6061 billet aluminium and are black anodized for a factory appearance. All internal levers are investment cast from A-2 tool steel, CNC machined and heat treated for excellent wear characteristics. The levers are electroless nickel plated for smooth operation and a bright appearance.

Remington Trigger L-1

General purpose hunting. 1.5 lbs. to 4 lbs. Factory adjusted to break at 2.3lbs. Will service Remington models 700, 40X, Model 7, XR-100 and the rear grip XP-100 pistol.

#RB-L-1 Black
#RB-L-1-S Silver

Remington Safety Kit

Fits all Rifle Basix Remington Triggers, and Remington Factory Triggers manufactured before 2006.

#RB-SAV-R

Buffer Technologies Recoil Buffer

Each carefully designed buffer is made from a polyurethane with specific shock-absorbing properties. When it is placed between the bolt and what it slams against at the extreme range of its travel, the buffer acts as a gentle cushion. Without the buffer, the bolt is driven backwards to make direct violent contact with another piece of steel. In time, this pounding takes its toll. The gun becomes less accurate and the action becomes dangerously loose.

Tri-Tech TTT M4 Grip

The TTT M4 Fighting Grip is manufactured to provide the end-user with the highest quality foldable weapon's forearm grip in the operational field today. Military and Law Enforcement operators are demanding a folding grip that permits them to "get small" from cover by quickly folding the grip parallel to the weapon's forearm while maintaining the natural feel of the forearm.

#TRI-MFM4-FG-BLK

Magpul RVG Rail Vertical Grip

Designed for use with milspec 1913 Picatinny rail hand guards, the RVG is a basic, light weight, cost-effective vertical fore grip. Shape is ergonomically designed for use as a traditional vertical grip.

#MAG-413-BLK

Magpul MVG MOE Vertical Grip

Designed for use with MOE and ACR™ (Adaptive Combat Rifle) Hand Guards, the MVG is a basic, light weight, cost-effective vertical fore grip that attaches directly to these hand guards without any rail needed. Shape is ergonomically designed for use as a traditional vertical grip.

#MAG-412-BLK

Accu-Shot BT27 - Folding Vertical Fore Grip

Accu-Shot Folding Vertical Fore Grip using the base and mechanism from our Precision Rail Monopod (PRM), adding a non-moving 3" handle that is knurled with two flats machined into opposing sides where the Buna O-Rings will secure light switches and/or lunch money or both.

Unscrewing the bottom will reveal a storage compartment for a single 123 battery and placing a battery in there positive side (+) towards the relieved cap will insure it won't be drained.

#AS-BT27

Weaver Rail Mount Vertical Grips

Enjoy improved weapon control and heat management with Weaver's new Rail Mount Vertical Grips. Molded of high performance fiberglass-reinforced polymer, these vert grips feature redundant clamp screws for secure, reliable mounting and an adjustable fit to compensate for out-of-spec rails. The grip's o-ring sealed storage compartment is ideal for tools, batteries or spare parts while the two different caps (included) allow for custom length. Made in the USA.

Accu-Shot

The Accu-Shot precision monopod is designed, engineered and built for shooters who demand a high degree of accuracy to meet the challenge of accurately sighting a rifle from either the bench or in the field. Used with a bipod from a stationary surface, Accu-Shot provides an adjustable 3-point platform to your setup, stabilizing your rifle for precise vertical adjustment. By simply rotating the Accu-Shot monopod's soft-touch actuator knob, approximately 100 inches of elevation adjustment at a distance of 100 yards is available.

Accu-Shot Precision Monopod with Quick Knob Option

This unit used with a bipod, attaches to your rifle's rear sling stud, providing repeatable elevation adjustments. One piece unit constructed from machined T6061 Hard anodized Aluminum with Grade 8 fasteners and comes ready to attach to your rifle using an Uncle Mike's Swivel. The leg folds up and retracts, allowing the concurrent use of your sling. No tools required.

- #AS-BT01-QK BT01, Range of 3.4 – 4.5"
- #AS-BT04-QK BT04, Locking version, range of 3.65 – 4.75"
- #AS-BT05-QK BT05, Locking version, range of 4.75 – 5.85"

PRM Standard with Quick Knob Option

The Precision Rail Monopod (PRM) was inspired by the Magpul Precision Rifle Stock (PRS) and has several other applications where a Picatinny Rail is found, including as a folding vertical fore grip. The PRM is our second departure from our original monopod, the first being the ASAI which we borrowed the mechanics from to provide a proven system for the PRM including the push button deployment and retraction feature. Major components are constructed from T6061 Aluminum with a hard anodize finish, internal components made from alloy steels, heat treated to Rockwell 52 for long lasting strength and durability. The leg folds up and retracts out of the way when not needed. Black only.

- #AS-BT12-QK BT12, Range of 3.4 – 4.5"
- #AS-BT13-QK BT13, Range of 4.5 - 5.85"

BT03, M1-A/AR-15 Sling Stud Accessory

Replaces rear M1-A/AR-15 fixed sling loops with a common sling stud. This is necessary for attaching the Accu-Shot to the M1-A, SR and AR family of rifles. Simple installation requires a Screwdriver. Made of steel. Black only. Made in the U.S.A.

#AS-BT03

BT08 - ASAI (Accu-Shot Accuracy International) Monopod

The patented Accu-Shot Accuracy International (ASAI) monopod for the Accuracy International AE, AW and AICS systems. Major components constructed from alloy steels, heat treated to Rockwell 52 for long lasting strength and durability. The ASAI is attached via an application specific nut without modification to the stock and is deployed and retracted with the press of a button. The same actuator knob with steel on steel threads and locking feature found on the BT04 is utilized on the ASAI. The leg folds up and retracts out of the way when not in use. This unit allows a range of travel of approximately 1.05" or elevation adjustments between 3.45 - 4.5" (measured from center of lower Butt-stock bolt clearance hole).

#AS-BT08-QK BT08, Range of 3.4 – 4.5"

BT15 3.35" 1913 Rail

The BT15 3.35" 1913 Rail will accommodate hole patterns with a center to center spacing of 1.30 to 2.25" with a relieved base to accommodate curved surfaces. A standard sling stud can be used as one fastener or two button head machine screws can be used to attach this rail to the forearm of standard rifle stocks. The BT15 can also be attached to a horizontal surface on the butt section to attach our BR12 or BT13 Precision Rail Monopods.

118-ATI-BIP0300-B

Shooters Ridge Universal Bipod

Enjoy the benefits of a steady rest no matter what firearm you take afield. The new Shooters Ridge Universal Bi-pod features a lightweight molded design that clamps easily onto any standard barrel. With a built-in lock to hold the bi-pod in a closed position for carrying, the Universal Bi-pod is a great way to ensure your next shot is right on target.

#105-STR-10251

Shooters Ridge Bi-Pods

Shooters Ridge Adjustable Bi-Pods provide Rock Steady® assurance for precise shot placement. This compact and lightweight line of bi-pods offers a variety of both pivot and standard models that easily attach to the sling swivel stud. The new 14 1/2" · 29 1/4" standard and pivot bi-pods represent the tallest option available from Shooters Ridge and expand an already existing full line of length options.

- #105-STR-40854 Adjustable from 6"-9"
- #105-STR-40853 Adjustable from 9"-13"
- #105-STR-40852 Adjustable from 13.5"-23"
- #105-STR-40452 Adjustable from 14.5"-29.25"

Shooters Ridge pivoting Bi-Pods

These pivoting bi-pods are designed specifically for hunters who need a steady, portable and versatile rest out in the field. Available in three length options, you're sure to find the right fit for your hunting situation. From sitting or kneeling to prone position, there's a Pivot Bi-Pod for you.

- #105-STR-40855 Adjustable from 6"-9"
- #105-STR-40856 Adjustable from 9"-13"
- #105-STR-40857 Adjustable from 13.5"-23"
- #105-STR-40453 Adjustable from 14.5"-29.25"

Shooters Ridge Deluxe Bi-pod

In the quest to provide hunters with stronger, lighter, quieter bi-pods, Shooters Ridge introduces the Adjustable Deluxe Bi-pod. An innovative mounting system makes this the easiest bi-pod attachment on the market. Up to 30% lighter than conventional bi-pods, the Adjustable Deluxe Bi-pod features twist lock aluminum legs that reduce weight, increase strength and allow stealthy deployment and dual thrust bearings that allow hunters to swivel and cant their gun to stay on moving game. Use with or without a sling.

- #105-STR-40455 Adjustable from 9"-13"
- #105-STR-40457 Adjustable from 13"-23"
- #105-STR-40456 Extra Deluxe Bi-pod Adaptor

Shooters Ridge Deluxe Bi-pod with Picatinny Rail Attachment

Give your AR-style rifle the steady rest and rapid deployment of Shooters Ridge's Deluxe Bi-pod. The new Deluxe Bi-pod with Picatinny Rail Attachment allows shooters to affix the new Deluxe Bi-pod to a picatinny rail—giving AR shooters a whole new advantage in bi-pod technology. Easy on/off combined with lightweight, twist-lock legs makes the Deluxe Bi-pod a stealthy addition to any AR-style rifle.

#105-STR-99555

Stack Sling Delta II

The Stack Sling Delta II has a “double shock impact element” on each end of the sling which is also designed to minimize the weapon’s “shock effect” on the operator. These shock impact elements expand forward and contract backward under the weight of the weapon, thereby absorbing a large percentage of the shock impact created by such activities as jumping or dropping from aircraft or buildings onto the ground. Attached to each SSDI/SSDII™ shock impact element is a Mil Spec HK weapon style lobster hook. The SSDI/SSDII™ weapon hooks can be secured to almost any weapon that has two sling swivels points.

#TRI-MFSSD2

Built-In Shock Elements in Both Straps

Tri-Tech TRAS Tactical Rifle Sling

The TRAS gives the operator the ability to shoot from high angle platforms, aerial platforms, and marine platforms. The TRAS Sling also offers a large margin of safety to the operator in the high angle, aerial, and marine platform environment. The TRAS is possibly one of the only slings in the CQB environment that can furnish the operator with vertical cover by using the primary weapon as a shield and allowing the operator to deploy a secondary weapon immediately.

A.R.M.S. SWAN Quick Disconnect Rifle Sling

This unique system was specifically engineered to provide the maneuverability of a single point sling with the stability and performance of a dual point sling. The ability of this one sling to be re-configured on the fly from a dual point to a single point without the need for additional hardware or complex rigging made it ideal for long patrols from the “Z” without compromising performance on the “X”.

Magpul ASAP Ambidextrous Sling Attachment Point

The ASAP was designed to give a shooter over 180 degrees range of motion of the sling attachment point and can be used ambidextrously by both left or right handed shooters. This sling mount gives the shooter a tactical advantage allowing a full range of motion and minimizes binding while switching shoulders.

#MAG-500-BLK

Magpul RSA

The RSA provides a forward sling attachment point for the Magpul MS2 and other clip-in sling systems.

#MAG-502-BLK

Magpul MS2 Multi Mission Sling System

Driven by the operational experience of Magpul Dynamics SM instructors, the MS2 Multi-Mission Sling System was designed to give a versatile weapon-retention solution for a multitude of tactical environments and missions. As a standalone product, the rapidly-convertible MS2 allows an operator to leverage the maneuverability of Single-Point® attachment for direct-action, or two-point attachment for stability. Single-hand adjustments, quick-detach lanyard and positive-locking metal hardware provide flexibility and durability in a truly adaptable sling system.

GHOST Connector for Glocks

The patented Trigger Control Tab (TCT) triggers with this feature are called trigger control connectors. Because we invented and patented this feature it is only available on Ghost Inc. Trigger control connectors the Rocket & Tactical. The TCT works by eliminating over-travel, that extra trigger movement after the pistol fires. This shortens the total length of trigger pull and reset enabling you to shoot faster and better.

GHOST Rocket 3.5 lb Connector

For those who demand to be a lead director and Ghost Maker. This is the finest trigger control connector for all shooting activities including law enforcement & self defense. Notes: Requires Minor Fitting.

#113-GHO-2105-A-1 3.5 lb Trigger Connector for all Glocks

#113-GHO-2105-A2R 3.5 lb Trigger Connector for Ruger SR9

GHOST Ultimate 3.5 lb Connector

Highly polished for the smoothest drop-in 3.5 lb trigger pull possible and incorporates debris channels which makes the Ultimate smooth and self cleaning. These features along with pre-polishing gives you the Ultimate in drop-in light smooth 3.5 lb trigger pulls. Notes: Drop-in no Fitting.

#113-GHO-2105-E-4 3.5 lb Trigger Connector for all Glocks

#113-GHO-2105-E2R 3.5 lb Trigger Connector for Ruger SR9

GHOST Standard 3.5 lb Connector

3.5 LB precision connector is designed & manufactured to exacting tolerances and is polished to ensure the smoothest trigger function possible. Ghost's 3.5 lb connector gives you a slightly shorter and crisper trigger break with a positive reset. Notes: Drop-in no Fitting.

#113-GHO-2105-B-0 3.5 lb Trigger Connector for all Glocks

GHOST Ranger 4.5 lb Connector

Ideal for those who demand the finest drop-in trigger connector for self defense. The GHOST RANGER is the one Ghost family of trigger connectors that makes your glock more reliable. Notes: Drop-in no Fitting.

#113-GHO-2105-F-1 4.5 lb Trigger Connector for all Glocks

GHOST Tactical 5.0 lb Connector

Ideal for those who demand the finest self defense trigger control connector for all shooting activities including law enforcement & self defense. The GHOST TACTICAL 5.0 lb is the one Ghost family of trigger connectors that makes your Glock more accurate and more reliable by eliminating over-travel and the self cleaning holes. Notes: Drop-in no Fitting.

#113-GHO-2105-D-4 5.0 lb Trigger Connector for all Glocks

#113-GHO-2105-D2R 5.0 lb Trigger Connector for Ruger SR9

GHOST LO-PRO Magazine Release

Gives you a rapid magazine release to insure faster reloads with a very low profile.

#113-GHO-LOWPRO

GHOST X-Mag Release

Designed so that you can drop a magazine without changing your firing grip and so you do not have to modify your Glock's frame.

#113-GHO-EMR2200

Ghost Armorer Tool Kit for Glocks

2.5 mm punch with our own orange armorer's plate. This is all you need to disassemble and/or diagnose any and all Glock problems. Great for installing all our trigger products especially the trigger control connectors.

#113-GHO-AKT

Ghost Maritime/Marine Spring Cups for Glocks

Enable your Glock pistol to shoot underwater and under hostile environmental conditions. Notes: Drop-in no Fitting.

#113-GHO-MSC

GHOST Grip Plug Medium & Large Frame Glocks

Designed to keep dirt and debris out of the action of your Glock also serves as a magazine funnel to aid in reloading and prevents the butt of the Glock from ripping through your shirt. Notes: Drop-in no Fitting.

- Removal of slotted grip screws (bit is replaceable with any standard 1/4" hex-drive bit)
- Magazine catch and support plate removal and installation
- Mainspring removal (old style and 2-piece assemblies)
- Magazine disassembly (10 round and 15 round)
- Removal and installation alignment of pivot pins
- Removal and installation of springs

#SMC-SPD-Tool

Sightlink Signature Series Pistol Sights

Sightlink now adds Signature Series pistol sights to complete its winning rifle and shotgun fiber optic sight line-up. Sightlink fiber-optic sights are used by winning shooters Emanuel Bragg (two time USPSA Gold Team World Shoot winner) and Ted Puente (USPSA Limited Pistol Nationals winner & two time winner of USPSA Limited 3-Gun Nationals) — shouldn't you be using the best, too?

The foundation for the successful use of iron rifle or pistol sights is a front sight that is in sharp focus. The rear sight and the target can be out of focus, but the front sight must be crisp and clear. If not, the shot will not be successful.

Sightlink fiber-optic sights allow the eye to easily and quickly shift from the task of acquiring a distant target to rapidly focusing on the front sight — instantly improving both accuracy and speed. Available in popular colors, Sightlink fiber-optic rods are intended to be changed at the range in seconds.

Signature Series sights are available in three widths to match your shooting style and your rear sight. Standard width sights are .120" wide and utilize a .060" (1.5mm) fiber-optic rod. Match width sights are .095" wide and utilize a .040" (1mm) fiber-optic rod and Ultramatch width sights are .070" wide and use a .030" (.75mm) fiber-optic rod.

Signature Series sights are also available in multiple heights, permitting you to tailor your sights to unique aspects of your weapon and ammunition combination. "0" Sights are standard height. "+1" Sights are shorter, but will move the point of impact up. Use "+1" sights when your weapon shoots too low using standard sights. "-1" Sights are taller, but will move the point of impact down. Use "-1" sights when the weapon shoots too high using standard sights.

Signature Series pistol sights are available for most popular handgun dovetails including Heine, Novak, XD, Sig, Para, CZ, S&W M&P, and the Glock mounting system. Check your existing front sight height before ordering, and remember that changing rear sights may change front sight height requirements.

CDM Gear MOD-C Barrel Flashlight Mount

Design Clamp is finally available again in a new design and fit for 1" flashlights. This superior, light weight clamp is small and compact enough to reduce your shotgun profile so it reduces hang ups and snags. The light mount has been moved out a bit for even better light control. Steel threaded inserts means no stripped threads when tightening the clamp down.

#CDM-MOD MOD-C w/ 3 slot rail

CDM Gear BMT - Barrel Magazine Tube Mount

The Barrel Magazine Tube clamp is finally available again in a new design and fit. This stylish, light weight clamp is small and compact enough to reduce your shotgun profile so it reduces hang ups and snags, yet allows the mounting of scope rails at optimal locations. Steel threaded inserts means no stripped threads when tightening the clamp down.

#CDM-BMT-3 BMT w/ 3 slot rail

BMT w/ 3 slot rail and Optional Swivel Set

CDM Gear MT Clamps

Places the light at the optimum location for finger accuated lights, not below the centerline of the shotgun, so you don't have to shift your grip to turn the light on. Steel thread inserts won't "strip out" like aluminum threads in thin walled clamps. Provides a solid "lock up" around the mag tube to mount a light, laser or sling swivel on just about any 1" mag tube.

#CDM-MT MT Clamp w/ 3 slot rail

Aimpoint-Comp-M4, 2MOA

The Aimpoint CompM4 series of sights are the finest sights that Aimpoint has ever produced. Improvements include improved energy efficiency that provides up to 8 years of continuous use from a single AA battery! The CompM4 sights incorporate an integral mount that eliminates the need for a separate ring, and can be customized with vertical and forward spacers to fit a variety of weapon systems. They can also be used by hunters and sport shooters that need night vision compatibility.

To accommodate our customers, the CompM4 series of sights are available in two versions. The CompM4 offers a high battery compartment, while the CompM4s offers a low battery compartment. In all other aspects, the Aimpoint CompM4 and Aimpoint CompM4s are identical.

#AIM-12172 Aimpoint Comp M4s Low Battery Compartment

#AIM-11972 Aimpoint Comp M4 High Battery Compartment

Aimpoint Micro

Micro H-1 & R-1 - Designed with the hunter in mind, these sights are the lightest red dot sights tough enough to bear the Aimpoint name. Small enough to be used anywhere that you could put iron sights, these sights can be used on any type of firearm or archery equipment. A lightweight rifle with an Micro H-1 & R-1 mounted on it remains a lightweight rifle! While the Micro T-1 is able to perform under extreme conditions while adding negligible weight to your weapon. Suitable for use on Rifles, Carbines, Shotguns, Submachineguns and Handguns, the Aimpoint Micro T-1 is ideal as a stand-alone sight, and can also be "piggybacked" on top of larger magnifying scopes, night vision, or thermal imaging optics.

The Eotech HWS is actively in use with military forces around the globe, including many special operations forces, like USSOCOM, where it is standard for close quarter, urban combat. Military units like Stryker Brigade, 10th Mountain and 3rd Infantry have chosen the holographic weapon sight as its optic of choice. It is battle proven to withstand the abuse that any harsh environment, high powered weapon platform, or military mission can dish out.

Trijicon ACOG®

Trijicon® introduces the official military version of the Triji-ACOG® 4x32 to the consumer market so you can now have latest in advanced combat optics.

- New to the consumer-perfect for varmint or big hunting
- Powered by Trijicon's patented fiber optics and tritium-based technology
- Incorporates a Bullet Drop Compensator (BDC) offering additional aiming points out to 800 meters or more
- Incorporates the innovative Bindon Aiming Concept™ (BAC)
- Multi-layer lens coating for maximum optical performance in any light
- Waterproof (500ft/150 meters) and nitrogen-filled to eliminate fogging
- Housing is made of forged, 7075-T6 aircraft aluminum alloy
- A spacer system is provided allowing the sight to be configured properly for varying weapons systems

Trijicon ACOG® 6X48

Trijicon expands its extremely popular line of Trijicon ACOG® gunsights by introducing the newest addition – the rugged Trijicon ACOG® 6x48.

- Designed specifically for machine guns and military crew served weapons
- Enhances target identification and hit probability on shots out to 1,200 meters
- Powered by Trijicon's patented fiber optics and tritium-based technology
- Incorporates a Bullet Drop Compensator (BDC) offering additional aiming points estimated for trajectory
- Incorporates the innovative Bindon Aiming Concept™ (BAC)
- Waterproof (100 ft/30 meters) and nitrogen-filled to eliminate fogging
- Housing is made of forged, 7075-T6 aircraft aluminum alloy
- Lifetime Warranty
- Battery-Free

Trijicon AccuPoint®

Trijicon® introduces the new Trijicon AccuPoint® with a crosshair reticle – the world’s only battery-free illuminated crosshair-eliminating the potential for failure.

- By popular request, Trijicon® delivers the new crosshair reticle, illuminated by Trijicon’s patented fiber optic and tritium-based technology for effective aiming
- Innovative fiber optics automatically adjust the brightness level and contrast of the aiming point to available light conditions
- Improved Manual Brightness Adjustment Override
- Multi-layer coated lenses for the superior light transmission with no distortion
- Quick-focus eyepiece and long eye relief
- 1.25-4x24, 3-9x40 or 2.5-10x56 magnification options
- Crafted from aircraft quality, hard anodized aluminum

A.R.M.S. #15Trijicon™ Reflex Mt. Platform

A.R.M.S. has succeeded in developing an ultra low profile mounting platform for the Trijicon Reflex sight. The combination of the A.R.M.S. repeat zero and patented Throw Lever system and the Reflex sight provide the shooter with built in streamline appearance, function and superb fast action accuracy.

The #15 platform is attached to the bottom of the sight by 3 screws that are supplied with the platform, and provides 2 positive locking Throw Levers with A.R.M.S. patented no-mar buffer pads, no gunsmithing required. The #15 Reflex mount platform meets or exceeds all mil-spec requirements just like all other A.R.M.S. standard mil-spec products.

Trijicon Reflex®

Trijicon introduces the Trijicon® Reflex, a new non-magnified, self-luminous sight engineered to provide additional light gathering capabilities.

- New 42mm lens gives you the largest sight picture possible
- Innovative fiber optics automatically adjust the brightness level and contrast of the aiming point to available light conditions
- Parallax-free sighting enables fast, both-eyes-open target acquisition and accurate aiming
- Tritium-phosphor lamp aiming reticle glows in low-light conditions for precise shot placement
- Adjustment range of +/- 30 MOA (once click per inch at 100 yards)
- Manufactured from cast A356-T6 aluminum with hard coat anodizing

Trijicon TriPower®

The World's First Triple-Illuminated Reflex Sight

The Trijicon TriPower provides a perfect solution for those requiring fast action, both-eyes-open aiming precision and speed in a diverse array of lighting conditions—ranging from dim to completely dark—even when those conditions might change in the same round of fire. This super dependable reflex-style sight features an exclusive red chevron-shaped reticle illuminated by three lighting sources:

1. Integrated Fiber Optic System
2. Tritium-Illuminated reticle
3. On-Call Battery Backup

Trijicon RMR™

The new Trijicon RMR™ (Ruggedized Miniature Reflex) has been introduced to match the legendary toughness of the Trijicon ACOG® (Advanced Combat Optical Gunsight).

It can be teamed up with the ACOG® or AccuPoint® for the ultimate in fast target acquisition or precise aiming at extended distances.

The RMR™ offers two illumination configurations. One choice is an innovative LED (light emitting diode) insert that automatically adjusts for brightness in any lighting situation and ensures optimum visibility of dot against the target. The second option is a dual-illuminated, battery-free model featuring Trijicon fiber optics and tritium. Accuracy is further enhanced with adjustments for windage and elevation and clarity is assured with the sight's ultra-clear, hard-coated lens.

Trijicon RMR™ Dual Illuminated Sight

Trijicon RMR™ Sight (LED)

Trijicon RMR™ Dual Illuminated Sight — 7.0 MOA Red Dot

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR™ (Ruggedized Miniature Reflex) is designed to be as durable as the legendary ACOG. The RM04 is a battery free sight, featuring Trijicon fiber optics and tritium.

- #TJ-RM03** Dual Illuminated Sight — 13.0 MOA Amber Dot
- #TJ-RM04** Dual Illuminated Sight — 7.0 MOA Amber Dot
- #TJ-RM05** Dual Illuminated Sight — 9.0 MOA Amber Dot

Trijicon® Bright and Tough Night Sights

Trijicon Bright & Tough™ Night Sights are three-dot iron sights that increase night-fire shooting accuracy by as much as five times over conventional sights. Equally impressive, they do so with the same speed as instinctive shooting—and without the need for batteries. Housed in a metal body and cushioned within silicon rubber, Bright & Tough Night Sights feature a unique shock-resistant design that is patented by Trijicon. Each lamp is capped with a sapphire jewel to help evenly distribute the light while protecting the lamp from solvents and puncture. Contained within aluminum cylinders for additional protection, the lamps are mounted on silicon rubber cushions to withstand shock and heavy recoil. Green lamps are warranted for 12 years from the date of manufacture.

Vortex SPARC Red Dot Scope

It takes a SPARC to light a fire. The new, compact, daylight-bright SPARC (Speed Point Aiming for Rapid Combat) is packed with performance features and lends itself to a wide variety of firearm platforms-including AR15s, shotguns, and pistols. The modular three-piece base offers four separate mounting heights for user- and weapon-specific customization. Digital rear-facing and side controls for power on/off, dot brightness and night vision mode. Aircraft-grade 6061-T6 aluminum body. Get on target fast with the SPARC.

The versatile multi-height mount system of the SPARC accommodates AR15s needing absolute or lower 1/3 co-witness heights and uses a standard Weaver or Picatinny base (not included). The SPARC is also threaded to accept accessory ARD and comes with a 2x doubler.

#115-V-SPRC

Vortex StrikeFire Red Dot Scope

When the situation demands fast shooting... and a big scope with a narrow field of view won't cut it, the StrikeFire red dot riflescope lets you shoot quickly with both eyes open! With unlimited field of view and eye relief-nothing gets you on target faster than this tough, shockproof and waterproof red dot scope.

- Shockproof with rugged one-piece 30mm aluminum alloy tube.
- High recoil caliber rating-tested with .375 H&H Magnum for 1000 rounds.
- Included extra-high 30mm ring puts scope's bore center 37 mm (1.46 inches) above the base height. Commonly used for mounting with a Flat Top AR15, providing absolute co-witness with iron sights.

#115-V-SF-BR-AR15

Vortex VMX3 Magnifier

With 3x magnification and a durable armored construction, the Vortex VMX3 magnifier can be used to quickly add precise, longer ranging ability to red dot type sights including the Vortex SPARC and StrikeFire red dots. The VMX3 is easy to use and does not require any special sight-in. Just zero-in the red dot scope as normal, then add the VMX3 behind the scope for the additional magnification.

#115-V-VMX3

Vortex Bubble Level

For the most precise long-range shooting, use the bubble level to ensure that the rifle is perfectly vertical. This will eliminate potential error caused by shooting a canted rifle. Mounts quickly and easily to the riflescope tube.

Nightforce Optics

The philosophy of Nightforce is highly specialized and focused on building the ultimate instrument for the application. Our research and testing has developed new standards in manufacturing and quality control. Every Nightforce scope is assembled at our factory in North Central Idaho. All Nightforce scopes are 100% inspected and certified, passing vigorous testing prior to shipping. Our commitment to ultimate riflescope performance by using cutting edge technology and advanced mechanical designs is unparalleled in the industry. All NXS models share exceptional features, making them the finest riflescopes ever produced.

Horus Vision Scopes

It's a straightforward proposition—the more light that passes through the scope, the better you can see and the more accurately you can shoot. Horus Vision builds all our scopes using the best glass and best coatings available. They are unparalleled in brightness and clarity, from the center to the edges of the lens. Our optics were independently tested to be on par with the world's best, and our demanding calibration means a mil is a true mil, no matter what.

Horus Vision Falcon

Illuminated 5-20x50 Solid Steel Scope

A superb scope for all needs. Its solid steel tube is tough enough for heavy caliber use out to 1500 yards plus.
#HV-OJ02551

Horus Vision Predator

8-26x50 SMOA Non-Illuminated Varmint Scope

Thin reticle lines for small targets. Calibrated in inches. For 1200 yards plus, depending on rifle and ammo.
#HV-OJ0708N

Horus Vision Hawk

Non-Illuminated 3-12x50 Scope

Versatility meets distance. This simple, no-nonsense scope is excellent for shots out to 800 yards.
#HV-OJ4254N6

Horus Vision Raptor

Non-Illuminated 4-16x50 Scope

For serious shooters wanting extra reach and precision. For 1000 yards plus, depending on rifle and ammo.
#HV-OJ0254N

Horus Vision Talon

1-4x24 Dangerous Game Optic

Eliminate close-in targets with incredible speed. Ranges from point blank to 800 yards.
#HV-OJ05011

Horus Vision ASLI

Angle Slope Level Indicator

The ASLI gives sophisticated marksmen a slope indicator and cant indicator in one. Correct your bullet flight with confidence!

Butler Creek Flip-Open Scope Covers

Simply the ultimate scope lens protection for hunters and shooters. They're custom-fit to your scope, create a water-tight, airtight seal, and open with a touch of your thumbs, so you can put your shot through the narrow window of opportunity in the most extreme conditions.

- Fast, flip-open design - keep your eye on the target.
- Silent spring hinges won't spook game.
- Water-tight, custom-fit friction mounts anchor them to your scope.
- Air-tight semi-O-ring keeps out dust and moisture.
- Tested to -40°F.
- Truly ambidextrous.
- Weighs less than an ounce.
- Also made for spotting scopes.

**BSA Deer Hunter Shotgun Scope**

Shotgun scope 2.5x20 1" Tube

A hard working scope designed for the hard working man. Camera quality glass lens are ground to give you an undistorted and clear image.

#BSA-DH25X20

**Xenonics SuperVision - Digital Night Vision (2-8x)**

Nothing less than a paradigm shift in "night vision" technology, SuperVision utilizes the most sensitive and sophisticated CCD sensor in the world to capture invisible moonlight and digitally process the information, in the form of pixels, into a sharp, clear picture on a high-resolution display.

Product Features

- 2-8x Zoom Magnification
- Digital CCD Technology
- High Resolution Display
- Lithium-ion Battery
- Ruggedized Housing
- Comfortable Hand Strap
- Pre-Set Gain Controls
- Easy Carry Bag

Technical Specifications

- Resolution: 1280x768
- Min. Illumination: 0.0003lux
- Magnification: 2x-8x zoom
- Focus: 20' to infinity
- Diopter Adjustment: +2 to -6
- Field of View: 525' at 1000 yards
- Weight: 20ozs

SuperVision's™ performance exceeds military-grade (Gen III) night vision in every aspect: greater resolution, better clarity, longer range and the most significant factor of them all, zoom capability. SuperVision's patent-pending digital technology offers a 2x to 8x zoom magnification, something no other form of night vision can match. Military-grade night vision requires the installation of a cumbersome and awkward 3x magnifier, which then only gives one level of magnification at the expense of greater bulk and weight.

#XEN-001

**BSA Sweet Series S17-312X40**

The Windage and Elevation turrets have zero reset with "Allen" screw. Each model in the Sweet 17 series have an adjustable parallax setting of 10 to infinity. (With the exception of the model S17-27x32 which is 7.5 to infinity)

#BSA-S17-312X40

(S17-312X40 Shown)

**BSA Sweet Series S22-27X32SP**

The main feature of the Sweet 22 is their ability to compensate for bullet trajectory by specific grain weight. The elevation drum will compensate for .22cal grain weights of 36, 38, and 40. The Windage and Elevation turrets have zero reset with "Allen" screw.

#BSA-S22-27X32SP

BSA Sweet Series S22-39X40SP

The Sweet 22™ is 1/4 MOA, that means one click will move the bullet 1/4" at 100 yards.

**Advanced Tactical Camera**

Pacific Concepts/HBD Inc has been providing innovative solutions to Industry and Law Enforcement agencies for over 37 years. After over a year in R&D, they now have a new product to introduce. We developed this camera in partnership with a major video camera maker. This is the first hardened video camera developed for mounting on a firearm. Waterproof to 10 ft, runs off two AA batteries.

On the law enforcement side we

have had requests for mounts for ATV's, bike patrols, water bikes, boats and a hand held, waterproof, easy to use camera for boarding boats. The corrections field is using them for video taping cell extractions, deployment of less lethal launchers and riot situations.

Additional Specifications:

- Waterproof up to 3 meters and shock resistant for extreme conditions.
- Mount included for RIS/RAS interface system or weaver style mount. our product
- 640X480 VGA resolution at 30 frames per second.
- Both USB and RCA cables are included for easy playback on a PC or TV (NTSC).
- Onboard memory is 32mb (good for about 5 minutes).
- SD card expansion works with up to a 2 gig card (approximately 1 hour of audio and video at best quality) SD card is not included.
- Operates on two AA batteries, approximately 2 hours of use on a set of batteries (not included).

#107-PC-ATC

Bushnell Elite 3200 Rifle Scope

The Elite 3200 offers multi-coated optics for generous light transmission and crisp image quality. Our exclusive, patented Rainguard HD lens coating reduces large drops of water to near-microscopic specks, dramatically increasing light transmission and resulting in a remarkably clear image in wet weather.
#100-B-321040M 10 x 40mm

Bushnell Elite 6500 Rifle Scope

The Elite 6500 Series contains the world's most versatile riflescope, featuring a 6.5x magnification range, one of the widest in the industry. These scopes are ideal for hunters who want a scope they can use in the brush as well as on the wide-open prairie, from Georgia pine forests to the high peaks of the Rockies.
#100-B-652164T 2.5-16x 42

Bushnell Magnetic Bore Sighter

Works on all calibers and firearms. Revolutionary design eliminates the need for arbors. Magnetically attaches to the muzzle to facilitate a quick sighting in. Etched glass reticle.
#100-B-740001C

Millett 1-4X24 DSM Designated Marksman Rifle Scope

The Designated Marksman Scope Reticle offers quick sighting under the most demanding conditions of close combat or dangerous game. The "Dot-in-a-Donut" aligns naturally to give accurate shot placement at ranges of 3 meters to 400 meters. Range measurement by use of the known scale of the donut is a simple matter.

The Designated Marksman Scope fills the requirements of the law enforcement officer, rifle shooter, and the big game hunter who needs a quick-sighting system at ranges of 5 yards to 500 yards. The "Dot-in-a-Donut" reticle allows for fast, natural aiming. The shooter's eye lines up the circle at close range, and the one MOA dot gives accuracy at the longer ranges. Range estimation is straight forward by use of the circle out to 500 yards. Compact design, 30mm tube, fully coated glass and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At 1 power it works well as a reflex sight and at longer ranges the 4X magnification gives increased accuracy
#100-B-BK81002

VISM Center Beam Series

Engineered with a Proprietary Internally Housed Laser Sighting System, the Center Beam Series Scopes provide a unique sighting experience for a multitude of applications such as S.W.A.T. CQB Situations, Eliminating pests on the farm, and Competing in 3 Gun Competitions. Years of Engineering Expertise and Innovative Cutting Edge Technology are the forefront of the new Center Beam Technology. Center Beam Series Scopes are available with a Red Laser or a Green Laser to suit the needs of even the most discriminating shooter.

ACD - Anti-CANT Device

The patented ACD (Anti-CANT Device) is a simple spirit level mounted in an aircraft-quality, two-piece aluminum scope rings that mounts in minute without special tools. Properly mounted, the ACD allows the shooter to visualize and make adjustments for CANT, which experienced shooters recognize as rotation of a scope's crosshairs off a true vertical/horizontal plane. According to the Marine Corps Sniper Manual, compensating for CANT is critical to accurate long-distance shooting: At 1000 yards, 6 degrees of CANT (visualized as 1 minute on the face of a wristwatch) moves the bullet strike 55 inches from point of aim.

Weekend shooters who find varmints a challenge at several hundred yards are no less immune to CANT: 6 degrees of CANT at 100 yards gives the critters a new lease on life by a full 1/2 inch. Installed on a properly mounted rifle or pistol scope, the ACD uniquely equips the shooter to visualize and eliminate CANT with 100% certainty, 100% of the time.

The ACD has been extensively tested on rifles (does not require modification to the firearm or scope) and has stood up to heavy repeated recoil without shifting or detaching. Accuracy is within one-eighth of a degree. Mounts in minutes and can be placed either on top or below the scope, whichever is most comfortable for you and where it can be observed by the non-sighting eye.

- Eliminates 100% of CANT
- Accurate to within 1/8th of a degree
- Stands up to heaviest recoil
- Attaches in minutes without special tools
- No modification to scope or rifle required
- Works equally well on pistols or rifles
- Matches finish on most scopes
- Weighs less than 1/2 ounce
- Comes with complete instructions

Horus Vision ASLI

Angle Slope Level Indicator

The ASLI gives the sophisticated marksman a slope indicator and cant indicator in one hermetical-sealed unit. Its slope indicator eliminates guesswork in uphill and downhill shots by helping you find true level/ground distance: simply multiply the range to the target by the cosine value shown on the slope indicator. The cant indicator is invaluable in long-distance shooting: it helps keep bullet flight true to your sighted aim. The ASLI attaches directly to your scope, is reversible to accommodate left and right handed users, doesn't need batteries, and comes with a hard rubber cap.

- #HV-ASLI-30 30mm Ring Mount
- #HV-ASLI-34 34mm Ring Mount
- #HV-ASLI-SR Side Rail Mount
- #HV-ASLI 1" Ring Mount

Vortex Bubble Level

For the most precise long-range shooting, use the bubble level to ensure that the rifle is perfectly vertical. This will eliminate potential error caused by shooting a canted rifle. Mounts quickly and easily to the riflescope tube.

- #115-V-RAC-VT-BL3 30mm Tubes

Nightforce Angle Degree Indicator

Takes the guesswork out of uphill and downhill shots. Calibrated in degrees, it gives you an instant readout which you can enter directly into the Nightforce ballistic software program on your pocket PC or use with a pre-printed angle drop chart. The two-piece low-profile Picatinny mount design allows easy installation without removing your scope.

- #117-NF-ADIMT-R

Nightforce Anti-Cant Device Top Ring Level

This anti cant device from Nightforce features a bubble level to show the shooter if they are canting to the left or right. The device is only for use with the Nightforce Unimount, Direct Mount or Steel Rings.

- #117-NF-BAPLVL

RIANOV

Range Finding/Ballistic Calculator Measures targets to determine range and calculates Ballistic Solution

The RIANOV™ brings the power of Optical Ranging and the flexibility of MILDOT and simulated MILDOT Ranging to any scope. With Barometric Pressure and Temperature monitoring and compensation built in, the shooter stays focused down range on the target. Delivering first shot accuracy like no other.

User Benefits:

- Rapid Ballistic Solutions - Temperature and Barometric Pressure compensated using your DOPE Table in < 5 seconds
- No need for Pressure, Humidity or Temperature offset charts
- Important information on the display when needed
- Back Light LCD suitable for all lighting conditions
- Long Battery Life - More than 6 months of typical usage using a single CR-123A battery
- Computer link via USB to upload weapon system and DOPE Table information
- No impact to weapon zero settings
- Mounts in under 5 minutes to your rail or your scope
- Pre-Loaded with 1,600+ Unique bullet types ready to use with the Ballistics Calculator
- Light weight - 2.8oz (80 Grams)
- Small size

Multiple Modes of Operation

- Measure All** - Measure the Size of Target, capture the Slope angle and Cant angle of the rifle and allow the RIANOV™ to calculate the compensated Ballistic Solution
- Measure Slope + MILS** - Capture the Slope angle and Cant angle of the rifle, enter the MILS and allow the RIANOV™ to calculate the compensated Ballistic Solution
- Measure Slope + Range** - Capture the Slope angle and Cant angle of the rifle, enter the Range and allow the RIANOV™ to calculate the compensated Ballistic Solution
- Enter Slope & MILS** - Enter the Slope and MILS information and allow the RIANOV™ to calculate the compensated Ballistic Solution
- Enter Slope & Range** - Enter the Slope and Range information and allow the RIANOV™ to calculate the compensated Ballistic Solution

Coming Soon – The Optics Tree

Ever wanted to use a spotting scope or camera but didn't have a mount to hold it steady? Ever wanted to use two optics devices simultaneously but couldn't hold both? Ever wanted to place an optical device in one location, but view remotely from a separate location?

The Mounting Solutions Plus Optics Tree is the answer to problems about securely deploying optical devices.

- With three different mounts, the Optics Tree can be securely clamped to almost any surface (shooting benches, walls, fence posts, trailer hitches – literally any stable surface), both horizontal and vertical, regardless of thickness, or mounted on a collapsible tripod if ground is level.
- With different height adjustments, the Optics Tree allows deployment at a height of just a few inches or at the user's standing height.
- With complete three axis adjustments, the Optics Tree allows any optical device to be securely aimed in any direction.
- The optics tree allows multiple devices to be simultaneously mounted and adjusted, permitting almost optics combination to be used at the same time (spotting scopes, video cameras, still cameras, spotlights, I/R lights, etc.)

The uses for the Optic Tree are limited only by the user's imagination:

Military or law enforcement operators can set up surveillance locations equipped with standard cameras, I/R cameras, thermal imaging units, and night vision cameras, clamp the units onto any surface, set up a wireless feed to a command facility, and move to the next location to set up more units.

Shooters can set up multiple spotting scopes or ranging devices, clamped to any stable surface. Birdwatchers can set up spotting scopes and still or video cameras. Hunters can set up scopes for day or night vision or I/R devices for night viewing of game. What use do you have for the Optics Tree????

Optional Tripod Model

NcStar 800 Laser Rangefinders

- Extremely light weight and compact
- Ability to range objects from 12 to 800 yards
- Rugged Outer Shell
- Water Resistant design

SureFire E2D Executive Defender

Compact, high-intensity incandescent, tactical-level incandescent flashlight with enhanced self-defense features.

Max Output: 60 lumens
Runtime: 1.25 hours
#SUR-E2D-BK

SureFire E2D LED Defender

Compact self-defense LED flashlight two outputs—high-output tactical-level lighting and low-output useful lighting.

Max Output: 5/120 lumens
Runtime: 76/1.9 hours, low/high settings
#SUR-E2DL-BK

SureFire E2L Outdoorsman

Compact dual-output LED with extended runtime for backpacking and general use.

Max Output: 3/60 lumens
Runtime: 100/11 hours low/high settings
#SUR-E2L-HA-WH

SureFire E2E Executive Elite

Incandescent. Compact, high-intensity incandescent flashlight for self-defense and general use.

Max Output: 60 lumens
Runtime: 1.25 hours
#SUR-E2E-BLK

SureFire M1 Infrared Illuminator

Battery-powered LED. Ultra compact extended runtime infrared (IR) LED flashlight for use with NVDs. Produce a smooth beam of invisible infrared light for use with night vision equipment.

#SUR-M1

SureFire L5 LumaMax

Compact, high-intensity LED flashlight for tactical, duty, and general use or conditions requiring an enhanced grip.

Max Output: 100 lumens
Runtime: 2 Hours
#SUR-L5-HA-WH

SureFire C3 Centurion

Compact, high-intensity incandescent flashlight for duty and tactical use or conditions requiring enhanced grip.

Max Output: 105/200 lumens
Runtime: 60/20 minutes
#SUR-C3-BLK

SureFire 123A Lithium Batteries

Optimized for use in SureFire flashlights, SureFire Lithium batteries pack a lot of power into a small package. And—unlike alkaline batteries, SureFire High-Performance Lithium Batteries boast a ten-year shelf life, which means they will be ready when you need them, every time.

For all SureFire Lithium battery powered lights.

- #SUR-SF6-BC** Box of 6 SureFire Batteries
- #SUR-SF12-BB** Box of 12 SureFire Batteries
- #SUR-SF72-BB** Box of 72 SureFire Batteries

SureFire MN02 Lamp Assembly

The MN02 lamp assembly fits in the 2-battery Executive series flashlights. The **MN02** produces 25 lumens of light for 2.5 hours, extending the runtime as compared to the MN03 lamp assembly, which produces 60 lumens for 1.25 hours.

Fits: E2, E2E, E2O
#SUR-MN-02 MN02
#SUR-MN-03 MN03

SureFire P60L LED/Reflector Assembly

LED reflector assembly that converts any SureFire flashlight that uses a P60, P61, P90, or P91 incandescent lamp assembly into a longer-running and higher-output when replacing a P60 lamp assembly

Max Output: 80 lumens
Runtime: 12 hours
#SUR-P60L Fits: 6P, 9P, C2, C3, D2, D3, G2, G3, G2Z, M2, Z2, Z3

SureFire P60 Lamp Reflector Assembly

The standard long life P60 Lamp Reflector Assembly

Max Output: 65 lumens
Runtime: 1 hours
#SUR-P60 Fits: 6P, C2, D2, G2, G2Z, M2, Z2

SureFire P90 Lamp Reflector Assembly

The standard long life P90 Lamp Reflector Assembly

Max Output: 100 lumens
Runtime: 1 hours
#SUR-P90 Fits: 9P, C3, D3, G3, Z3

SureFire V70 Holster

The patented V70 Speed Holster allows the user to quickly access the flashlight.

Fits: 6P, 6PD LED, 6PD, 6P LED, 9P, G2, G2 LED, G2Z, G2Z LED, G3, G3 LED, Z2, Z2 LED
#SUR-V70

SureFire KL5A LED Conversion Head

The KL5A LED conversion head provides your 6P, C2, G2, G2Z, M2, Z2 flashlights with the latest in high-intensity LED technology.

Max Output: 100 lumens
Runtime: 5 hours
#SUR-KL5A-HA-WH

SureFire Z49 Click-on Tailcap

Now you have a choice of Momentary or Constant-on light activation without having to rotate the tailcap of your light.

#SUR-Z49

SureFire KX1 LED Conversion Head

Converts a SureFire E1E incandescent flashlight into a higher-output, dual-output, longer-running LED flashlight.

Max Output: 45 lumens
Runtime: 40 hours
#SUR-KX1-HA-WH Fits: E1E and older model E1L with KL1 head

SureFire Z57 Click-on Tailcap Switch

Now you have a choice of momentary or constant-on light activation without having to rotate the tailcap of your light.

#SUR-Z57 Fits: E1E, E1L, E2D, E2D LED, E2E, E2L, E2O, L4

SureFire X300 LED Weapon Light

Solid-state, electronically regulated LED that generates 110 lumens of tactical-level light — enough to overwhelm an aggressor's night-adapted vision.

#SUR-X300

SureFire X400 LED WeaponLight w/ Laser

LED WeaponLight with an integrated red-laser sight mounted below its solid-state LED.

#SUR-X400

SureFire Saint Minimus - Headlamp

Saint Minimus is a virtually indestructible headlamp, just like Saint, but Minimus offers a lower profile and less weight. It's powered by one 123A Lithium battery that screws right into the housing utilizing Minimus's single-battery cap.

#SUR-HS2-A-BK

INOVA Color LED Flashlight

Primary LED: White;
Secondary LEDs: Red, Green, Blu
 With five high-performance, multi-programmable LEDs, it is the ligh for any situation. Among the virtu itless missions suitable for the IN Color flashlight are: a field light, close quarters battle, high-risk search, prisoner control, ground crew operations, fluid detection, target designation, and explosive detection and identification.

#INO-INF-BW125 Black

INOVA Inforce Color LED Flashlight

White LED
 The INFORCE White flashlight is designed to deliver precise lighting performance at three levels of light intensity. When required it can operate as a high-intensity signal/reconnaissance and navigation beacon, and has a built-in disorienting CQB strobe for use during search and entry engagements and operations.

#INO-INF-BC150 Black
#INO-INF-DC150 Desert

Fenix TK40, World's Brightest AA-powered Flashlight

The TK40 is the latest installment in the TK-Series and is the first Fenix to use Cree's MC-E quad-die, very powerful LED. Powered by eight AA batteries and boasting 630 lumens of output, the TK-40 is the ultimate portable, long-range illumination tool for the backpacker, explorer, and flashlight lover. The TK40 has two different modes of output, each with four different levels - a total of eight different outputs.

#102-FL-TK40-B

NcStar Laser and LED Flashlight

The NcStar Pistol and Rifle Mount Laser and 3W LED Flashlight Kit AQPFLS is constructed of hard anodized aluminum and reinforced nylon and ready to withstand even the toughest abuse.

• Flashlight Power: 120 lumens
 • Laser Power: 635-655nm <5mW

#111-NCS-AQPFLS

SureFire M952XM07 Mill

The M952XM07 is six-volt shock-isolated system powered by two lithium batteries with Throw-Lever Mount

Max Output: 65 /120 lumens
Runtime: 60/20 Minutes
#SUR-M952XM07

SureFire M961XM07 Mill.

Univ. WL, 9-Volt, 1.62" Head, Dual Thumbscrew Mount

Max Output: 65 /120 lumens

Handguard Mounted Light Rail

#LLR-FLR-001

TOP LIGHT by MSP

Head band with single rail mounted tactical light for hands free operation.

#LLR-00-HB1 Single Mount
#LLR-00-HB2 Double Mount

Helmet Mount

Instantly mounted fully adjustable tactical hands-free lighting. Snap the light off your weapon and on to your helmet.

#LLR-000-HM1

Tactical Light Velcro Mount

Attaches most rail mounted lights to any Velcro surface.

#LLR-LRM-002

Tactical Light Belt Loop Carrier

Safely store most rail mounted flashlights on your belt loop. Protected from accidentally being turned on.

#LLR-LRM-003

Round Accessory Mounts (Ram)

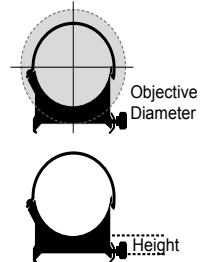

RAM adapters are now available to mount round accessories to a 1913 mil-spec Picatinny rail or Weaver rail. Flashlights, lasers, miniature camera bodies - literally any round accessory can now be instantly mounted or dismounted from any weapon system using RAM adapters.

RAM adapters are available in a variety of heights to accommodate almost any requirement, and need only a 1 inch clamping surface to mount. RAM adapters are available for both 1 inch and 30 mm accessories, and with use of simple bushings can be adapted to any other unique diameter accessory.

RAM adapters are light weight and have the lowest profile available - barely larger than the accessory. While light, RAM adapters use high strength steel thread inserts that won't strip no matter how tight the accessory is clamped.

	Height	Clearance Diameter

Uncle Mike's Kydex Double Mag Cases

Now protect your magazines like you do your firearm. Choose from single or double cases.

- Fits belt loops up to 1 3/4".

- #100-UM-51361 Double Stack
- #100-UM-51371 Single Stack

Uncle Mike's Clip-On Tactical Light Holder

This holder accepts Insight Technology M-3, M-5 and M-6 lights, Glock lights, and some Sure-Fire models. Clips on to any dress or duty belt up to 2 1/4".

#100-UM-50301

Uncle Mike's Universal Holster w/ MOLLE System

- Quickly changes between light bearing and non-light bearing pistols
- Converts easily from right hand to left hand carry
- Works with versatile MOLLE system for placement anywhere on the body
- Can be mounted on any 1.75" and 2" duty style belt
- Fits most medium and large auto pistols
- Works with SureFire and Streamlight weapon-mounted lights
- Mounts on vest or Drop Leg Platform
- Traditional thumb break with secondary ITW-Ghiletex buckle strap for added retention

#100-UM-7702001

Uncle Mike's Modular Drop Leg Platform

Ingeniously designed platform gives you the ultimate flexibility and stability needed to mount and carry holsters and important accessories on a soft-sided, drop leg platform.

- A perfect choice for strong or offside carry
- MOLLE compatibility creates total flexibility
- Internal pocket can hold armor or other items
- Fully adjustable to fit any size leg

#100-UM-7702520

Uncle Mike's Kydex Gun Holsters with Paddle & Belt Loop

Kydex Paddle Holster attachment

Featuring an ultra-adjustable design, this paddle holster is soft, pliable and features air vents for the utmost in wearing ease.

- Drawing is easier because the body's lead edge is cut down
- Adjusts for rake and height to match your torso height and body type
- An excellent choice for both men and women

Kydex Belt Holsters attachment

It rides close to the body at a mid-level height.

- Nearly vertical rake for conventional behind-the-hip carry. Can be used as an appendix carry
- Cut-down lead edge aids in presentation of firearm
- Fits belts up to 1 3/4"

Uncle Mike's Deluxe Range Bag

Simply the ultimate range bag - developed by shooters for shooters.

- Easy entry, a roll-up double-zippered flap with hook-and-loop fastener closes main compartment
- Easy carry - Shoulder strap with quick-release buckles and two web handles
- Protective - Padded pistol rug included with two lockable side compartments, plus a thickly padded compartment

Main compartment is 15" wide x 9" high x 7" deep (381 x 229 x 178 mm)

#100-UM-52411

(Contents not included)

Uncle Mike's Field Bag

- Roomy carry bag with removable hard bottom and dual zippers.
- External pouches at both ends-one with a zippered compartment for carrying I.D.
- Large front and rear external zippered compartments; front has divider.
- Three-sided zipper on main compartment allows full access while keeping bag upright.
- Wrap-around web handle and removable shoulder strap.
- Lockable zippers.

Dimensions: Center is 10" w x 20 1/2" l x 12" h

#100-UM-52481

Uncle Mike's Wheeled Duffle Bag, Black

If you're going out into the field for an extended time, you'll need a bag with this much carry room to get you there. And because it's on wheels, you won't be straining your back to get all your gear there.

- Huge center compartment and padded top-end compartment. Two full-length zippered side compartments - one is conveniently divided in half, the other offers generous storage. All compartments have lockable zippers.
- Internal tie downs in large center compartment keep your gear secured.
- Radiused urethane wheels provide maneuverability and easy transport, even with the heaviest loads.
- Polymer "pull" handle with metal legs collapses completely into molded recess for travel.

Dimensions:

Center compartment is: 13 1/2" w x 27 1/2" h x 14" d

Top-end compartment is: 13 1/2" w x 13 1/2" h x 2" d

M-Pro 7 Gun Cleaner

Vital to maintaining weapon reliability and performance by removing layers of fouling, embedded carbon, and conditioning the bore to help prevent future build-up.

- Significantly cuts cleaning time
 - Improves accuracy and reliability
 - Conditions to reduce future fouling
 - Removes carbon, lead and most copper fouling
- #100-MP7-071002 4oz Spray
#100-MP7-071015 2oz Spray

M-Pro 7 Copper Removal System

Copper fouling is trapped under layers of carbon. A systems approach is the only way to eliminate all copper.

- Up to 4x faster than ammonia based cleaners
 - Improves accuracy & reliability
 - Dissolves all copper fouling
 - Conditions to reduce future fouling
 - Safe on bore steel (for use inside the bore only)
 - Ammonia & odor free
- #100-MP7-071150 2oz Bottle
#100-MP7-071151 4oz Bottle

M-Pro 7 Cleaner Lubricant Protectant

Provides superior lubrication and corrosion protection. Use in conjunction with M-Pro 7 Gun Cleaner for deep cleaning and conditioning. M-Pro 7 Cleaner Lubricant Protectant's synthetic thin coat technology exceeds MIL-PRF-63460 and is rated at -55° to 800°+ Fahrenheit.

- Removes surface carbon quickly
- Repels dirt, dust and carbon
- Extreme climate protection
- Max temperature range lubrication (-85°F to 482°F)

#100-MP7-071403 4oz Bottle

Mil-Comm MC25 Cleaner/Degreaser 4 oz Pump Bottle

MC25® Firearm Cleaner Degreaser is Mil-Comm Products' environmentally safe, water based, pH balanced, non-toxic formula that emulsifies organic substances on contact including gun lubricants, powder residue and other debris. This non-toxic cleaner properly prepares all kinds of firearms for application of one of Mil-Comm Products' extreme performance lubricants. MC25® is proudly MADE IN THE U.S.A.

#MIL-MC25 4oz Spray

Mil-Comm TW25B grease .5 oz Reclosable Syringe

TW25B® Light Synthetic Grease is Mil-Comm Products' original formula and a top selling firearms lubricant worldwide. Its exceptional performance in adverse conditions has made it the choice of the U.S. Military and its Allies. TW25B grease is proudly MADE IN THE U.S.A. The plastic, tapered tip reclosable 0.5 oz. syringe is handy for applying a drop or bead to small or hard to reach areas. The tip head rotates to open or close flow.

#MIL-TW25B

Mil-Comm MC2500 oil .5 oz Reclosable Syringe

MC2500® oil is Mil-Comm Products' synthetic blend that is based on the same technology and delivers the same exceptional performance as TW25B® grease. The lower viscosity of MC2500® oil allows for easy migration to hard to reach weapon parts while its liquidity allows the user the ability to pour or pump the lubricant easily. These special characteristics of MC2500® oil make it outstanding for lubricating close-fitted, high-speed, extreme pressure precision parts. MC2500® is proudly MADE IN THE U.S.A.

#MIL-MC2500

Hoppe's Tornado Brushes

Known as "The Gunsmith's Brush", it has a special spiral-wound design that's highly effective at removing fouling, yet won't damage your rifling. Stainless steel loops eliminate any brittle ends that could leave scratches.

Gunslick Universal 3-Piece Coated Cleaning Rod

Protect your barrel and get a maximum clean with this new 3-piece sectional coated rod from Gunslick. Designed to be gentle on both the user and the firearm, this new rod uses an ergonomic T-handle and coated exterior to provide years of service of both shotguns and rifles. Perfect for carrying in your range bag or at home on your gun bench.

Kit Includes:

- 3 Piece Cleaning Rod
- Shotgun Slotted Tip
- .22 & .30 Caliber Brass Jags
- .22 & .30 Caliber Slotted Tips
- Muzzle Guard
- Shotgun Adaptor

#105-GSP-35010

MUZZLEMATE Cleaning Shield

Fast, easy and safe universal firearm cleaning tool - catch the mess! One size fits all, clamps to rifles, pistols and shotguns in seconds for complete protection.

The average firearm cleaning solvent is harmful or fatal if swallowed, requires medical attention if splattered into eyes or mouth, should not come in contact with skin and in some cases may even cause cancer and birth defects. Safe firearm cleaning should be a priority. You need the tools for safer, faster, easier maintenance. Hazardous chemical protection is important and MUZZLEMATE is the solution.

Hoppe's Soft Touch Cleaning Rod Handle
 Simply the most cost-effective way to own premium ball-bearing cleaning rods for all your firearms. A handle accepts all rod diameters and lengths.
 • Precision ball bearings for smooth rotation of rod.
 • Push-button rod attachment and detachment.
 • Accepts all rod diameters and lengths.
 • Padded, ergonomic design.
#100-HP-ECRH

Hoppe's Universal Bore Guide
 Keeps solvents from dripping into action and prevents excessive cleaning-rod contact with the rifling lands closest to the chamber.
 • Three interchangeable chamber tips to fit .17 to .416 caliber
 • Aluminum action collar fits .695"/.700" (17.65mm/17.78mm) diameter bolt actions of any action length
 • Threaded brass pin locks the guide into the action in place of the bolt to allow proper cleaning from the breech
#100-HP-UBG

Hoppe's Muzzle Guide
 Protect your muzzles from rod and cleaning handle contact. Simply fit against bore.
#100-HP-RMS Rifle
#100-HP-SMS Shotgun

Hoppe's Cleaning Cradle
 It sets up in seconds and securely holds any long gun in its over-molded rubber saddles.
 • Ideal for home, the range or on your tailgate in the field.
 • Adjusts for length.
 • Disassembles to fit in your range bag or cleaning kit.
#100-HP-HCC

Hoppe's Elite Soft-Sided BoreSnake Kit
 Strap this onto your belt or put it in your bag the next time you head out to the range or wilderness.
#100-HP-EBS12 12 gauge cleaning Kit
#100-HP-EBS9 9mm cleaning Kit

Hoppe's Bore Snake
 Hoppe's BoreSnake is the fastest bore cleaner on the planet. One pass loosens large particles, scrubs out the remaining residue with a bronze brush, then swabs it all spotless with a cleaning area 160X larger than a standard patch. Add a few drops of Hoppe's No. 9 Lubricating Oil or Hoppe's Elite and your gun's ready for storage.
 • The world's quickest, three-step bore shine.
 • Extremely packable.
 • Available for rifles, shotguns and pistols.

Pro Ears Gold Electronic Hearing Protection

The Gold Series Advantage is the balance achieved between comfort, noise attenuation and purity of sound. No compromises. No excuses.

Natural replication of amplified sound.

Real audiophiles understand that for purity of sound an analog sound system is superior to a digital sound system, however, digital systems can correct imperfections or enhance and modify sound better than analog systems. Most active hearing protectors or stereo headphones employ one technology or the other. Our engineers at Pro-Ears were not willing to compromise the quality of our sound for the sake of simplicity or cost. The result is the hybrid digital/analog system found exclusively in the Gold Series active hearing protectors.

Pro Ears Pro Tac Mag Gold

- Large ear cup designed for extreme noise environment. Maximum hearing protection
- Great for range masters and NRA shooting instructors
- Ideal for use with all handguns
- Scanner compatible for motor sports spectators
- Apple iPod, CD, motor sports scanner or radio compatible using a 3.5mm mini jack. Enjoy high fidelity sound while protecting your hearing
- Better than isolation headphones for blocking out unwanted noise while listening to music

Pro Ears Passive Hearing Protection

The Ultra Series Advantage is the great comfort and noise attenuation with a Pro Ears Warranty

When situational awareness is not as essential to mission accomplishment. A great pair of passive ear muffs are the most effective means to protect your hearing. Ear plugs can be effective only if they are properly inserted in the ear. Very often, due to discomfort or improper training the ear plug does not provide the level of protection advertised. A comfortable, well designed pair of earmuffs can protect your hearing for years to come.

So comfortable you won't mind wearing these earmuffs all day. With ProForm leather ear cushions and soft flexible headbands the Ultra Series passive ear muffs are the most comfortable ear muffs on the market today.

Don't over protect, Too much protection can be unsafe as critical communication cues cannot be heard. Selecting the proper level of noise attenuation to protect your hearing while not over protecting is made easy with the three levels of protection offered by the Ultra Series.

Our reliability gives you the confidence to be your best. We believe in our passive earmuffs so much we have provided the longest, most comprehensive warranty in the industry. The NRR is independently tested and certified. All Ultra Series products are dielectric construction.

Pro Ears Ultra 28 Hearing Protection

- Medium profile cup
- Adjustable headband and ProForm leather ear cushions
- Hard hat adaptor, fits most hard hats (may not be suitable for wide-brim hard hats)
- Hard hat adaptor pivots and locks in the up position
- Dielectric construction
- Suitable for moderate to high noise environment; extended wear around noisy lawnmowers and chainsaws
- When noise level is high but you still need to be more aware of your environment
- 33% lighter than the Ultra 33

Don't let your shooting passion damage your hearing—rely on Champion protection when at the range or in the field.

Champion Ear Muffs

Enjoy safe shooting with new sound dampening ear muffs from Champion®. These comfortable, stylish muffs provide superior hearing protection while remaining light and comfortable for the shooter. Available in either standard or electronic versions, they reduce harmful noise levels and provide a comfortable fit for those long days of shooting.

Features & Benefits

- Available in both standard and electronic offerings
- Noise reduction for superior auditory protection
- Collapsible for easy storage
- Adjustable for best fit
- Electronic muffs to amplify quiet sounds and protect against harmful noise levels (NRR 21dB)

- #105-CHP-40970 Passive; 27dB NRR
- #105-CHP-40974 Electronic; 25dB NRR
- #105-CHP-40975 Pink Ear Muffs-Electronic; 25dB NRR

Passive; 27dB NRR

Electronic; 25dB NRR

Champion Gel Ear Plugs

Champion® promotes safe shooting with their new hearing protection plugs. Available individually on a soft nylon cord or in bulk pack, these soft silicone gel plugs feature a firm inner stem to insert comfortably into a shooter's ears for great auditory protection at an affordable price.

Features & Benefits

- Soft silicone gel for a comfortable fit
- Bulk pack available
- Individual ear plugs with cord for easy use
- The plugs have a noise reduction rating (NRR) of 26

- #105-CHP-40960 Ear Plugs - 4-pair, gel
- #105-CHP-40962 Ear Plugs - Corded w/ case, gel

Champion Molded Foam Plugs

Champion® promotes safe shooting with their new Molded Foam Plugs. Designed to contour to a shooter's ear, these soft foam plugs provide a comfortable fit that reduces the harmful noise levels commonly found at ranges.

Features & Benefits

- Soft tapered foam for maximum comfort
- Provides excellent hearing protection when shooting
- Lightweight and disposable

- #105-CHP-40958 Molded Foam Plugs-6 pair
- #105-CHP-40959 Molded Foam Plugs-100 pair

Champion Shooting Glasses

Champion® presents safe, stylish and practical shooting glasses for youth and adults. The frames come in a variety of colors and feature sharp, image-enhancing lenses available in clear, yellow, and smoke tint. Maximize your vision and protect your eyes next time you're at the range or in the field—slip on a pair of Champion Shooting Glasses. It's style and safety you can depend on.

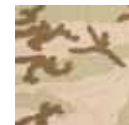

Features & Benefits

- Exceptional comfort and wrap around safety
 - Sharp images with no distortion
 - OSHA compliant—maximum Z87.1 safety rated
 - Scratch resistant lenses
 - 99.9% UVA/UVB protection
 - Durable "fold smart" frames won't damage lenses
- #105-CHP-40606 Black Frame—Interchangeable Lens (Clear/Smoke/Yellow)
 - #105-CHP-40604 Black Curved Adjustable Frame—Yellow Tint Lens
 - #105-CHP-40605 Pink Curved Adjustable Frame—Pink Tint Lens

McNett Camo Form

Protective Camouflage Wrap. Flexible, self-cling wrap stretches to conform to any object, without affecting functional controls. Ideal for shotguns, rifles, bows, scopes, binoculars, flashlights, outboard motors, oars, dog collars & other gear. Reusable—allows for easy change of camouflage patterns. Quiets clanking gear, helps prevent scratches, reduces glare and protects form dirt and debris. Improves grip and insulates hands from cold surfaces. Weatherproof, adhesion is not affected by immersion in water. Prevents slippage of weapons on rocks, steep terrain and other smooth surfaces.

Ghillie Suit - Light Weight Synthetic Camouflage Ghillie

Complete jacket & pants weight - (medium = 5 lbs). We use a no-see-um fabric for the inside lining. This feels smooth to the skin so you can wear a t-shirt underneath. On the outside is a nylon netting. Attached to this netting is our synthetic string. The nylon netting allows you to add local vegetation to blend into your local surroundings.

The cuffs on the jacket and pants each have cord-locks sewn in to keep the bugs out. The jacket has a draw cord on the attached hood, and a draw cord at the waist. The jacket has a zipper, and there is a flap that covers the zipper. Velcro is sewn in to secure the flap, covering the zipper.

The pants have elastic sewn in the waist for added comfort, and most importantly, belt loops!

Sizes - each size runs a little larger, and longer.

	Part Number	Size	Waist Size
Mossy	#GHS-PP-NMS-MM	Medium	28" - 36"
	#GHS-PP-NMS-ML	Large	32" - 40"
	#GHS-PP-NMS-MXL	X-Large	36" - 50"
All Season	#GHS-PP-NMS-ASM	Medium	28" - 36"
	#GHS-PP-NMS-ASL	Large	32" - 40"
	#GHS-PP-NMS-ASXL	X-Large	36" - 50"

Ghillie Poncho - Full coverage - Head to toe!

This is a one piece camouflage ghillie poncho. It is a one-size-fits-all. It will fit a person up to 6'6" tall, and can be trimmed to fit your height. Has sleeves for your arms, and an attached hood. Has a 60" chest.

This is the most popular ghillie suit for those who want to wear it as is, or assemble it to bdu's, or other clothing. Jute thread hand tied with over 3000 knots to a 5' x 9' knotted nylon net. Netting has 1"x1" squares, and has 500 lbs. Of tensile strength. The jute thread has 10-12 lbs of tensile strength per strand. 4-5 Strands of jute thread are attached to every knot. Actual weight for the full poncho is 7.5 Lbs. Most popular!

Lightweight Camouflage Complete Ghillie Suit Kit!

- Kit includes the following
- One 5' x 9' nylon netting.
 - Seven colors of next generation synthetic thread. (3.5 Lbs. Total)
 - Complete directions on how to assemble kit into a lightweight camouflage ghillie poncho.
 - Synthetic thread colors include : brown, black, gray, light green, olive green, tan & dark green. Synthetic thread is the next generation in building a lightweight camouflage ghillie suit, because synthetic thread is:
 - Water-proof • rot-proof • mildew resistant • fire-retardant
 - washable • odor-less • non-allergenic

"Stalker" Ghillie Poncho

This is the suit for those of you who want to lay down to varmint hunt, or do a lot of crawling. Jute thread is hand tied to our nylon netting. Netting has 1"x1" squares, and a tensile strength of 500 lbs. The jute thread has 10-12 lbs of tensile strength per strand. 4-5 Strands of jute thread are attached to every knot. Has separate sleeves to put your arms through, and an attached hood. The front is open for those of you who like to crawl on your stomach, and can be easily converted to your favorite bdu's for a super sniper suit. Directions for the sniper suit can be found on our "how to build" section listed on the left. The inexpensive sniper suit!

Actual weight for the "stalker" is 6 lbs. One size fits all. May be trimmed to fit. The width of the rear piece that flows to the ground is 30" across! If you are a serious crawler. Take a look at our sniper suit built on to a pair of military BDU'S.

BDU Ghillie pants

Our same high quality jute thread is sewn directly on to military bdu trousers. These are made by "atlanco". The sewn on jute thread covers the back and the front. It is attached just below the pockets so the front pockets are accessible. (Weight 3.5 Lbs.)

"Tracker" Ghillie Poncho

For those who only need the upper torso covered. This is the fast mobility suit. Designed for fast sprints, then kneeling down where you don't really need your lower half covered. The "tracker" has full sleeves for your arms, a generous hood, and covers the torso in front and back. Why buy a "rag" at other internet sites that don't cover the arms. Buy the "tracker"!

Assembled on a 100% nylon netting with 3.5 Lbs. of cut and dyed jute attached. Actual weight for the "tracker" is 4.5 Lbs." Add a pair of the sniper bdu pants to compliment this suit. Great for turkey hunters, or for those who will be kneeling down a lot.

BDU Ghillie Jacket

Our same high quality jute thread is sewn directly on to a military bdu 4 pocket coat. These are made by "atlanco". The sewn on jute thread covers the entire jacket in the front and the back, and has an attached hood. The hood is build the same way we build our ghillie poncho by hand tying the jute thread to a 1"x1" netting, and then sewing this to the jacket. This design allows you to stay cooler, allowing the wind to pass through, and also allows for better hearing. (Weight 6 lbs.)

CRKT EDC Folding Knives

You should think about what you do everyday before selecting the knife. For example, if you work in a warehouse and cut up cardboard you should definitely consider a serrated blade. If you do alot of small detail work you should consider a small knife with a sharp tip. No matter what your day job is, CRKT has the right knife for you.

CRKT Tactical Knives

Folding tactical knives are easier to conceal and to carry everyday. Check out the folding Hissatsu that is an assisted opening knife and includes AutoLawks. James Williams can penetrate 1/2" plywood with this knife (don't try this at home!) Also, check out the M16 series designed by Kit Carson. This incredible line up of knives have been a staple for years for law enforcement and military personnel. The flipper offers quick, reliable deployment that will get you out of trouble in a hurry. Please take the time to look at what we have to offer in tactical folding knives. We think you will find one to fit your needs.

M16-13 Special Forces
Black G10 Handle, Tanto, AutoLAWKS, Veff Combo Edge
• Blade: Length: 3.50" (89 mm)

CRKT Fixed Blade Tactical Knives

At CRKT we offer a wide selection of fixed blade tactical knives. We work with designers like James Williams, Pat Crawford and several others to bring to you knives that work in tactical situations. For instance, model 2010, the dragon designed by Bob Kasper and Pat Crawford is a fixed blade with G10 handles for superior grip. It not only looks like a combat knife, it functions like one! The I.F.B. by Russ Kommer is a new fixed blade that is forged out of one peice of molton steel. If you break it, we will replace it!

Crawford N.E.C.K.
